SANTA CATALINA ISLAND COMPANY

GENERAL OFFICES
AVALON, CALIFORNIA

August 1, 1939

Mr. Ernest A. Bryant
1280 Shenandoah Road
San Marino, California

Dear Mrs. Bryant:

In reply to your letter of July 29th, asking for permission to obtain seeds from the Catalina Ironwood tree, we will be very glad to grant this permission to you.

As I understand it, the members of your staff will make a trip to Catalina. This permission of course does not cover a camping permit as we would be unable to allow camping in the interior of the Island this time of the year due to the extreme fire hazard.

Our Landscape Superintendent, Mr. Albert Conrad, advises that there are some very good Ironwood trees on the easterly side of Mt. Black Jack along the new fire patrol road near the top of the Island. This could best be reached by landing at White's Landing and hiking up the main road to the top of Mt. Black Jack. Of course, if you want to go to other locations it will be agreeable.

Cordially yours,

SANTA CATALINA ISLAND COMPANY
